Ministry of Communications: development of telecommunications and data transmission networks in Belarus

The Ministry of Communications of Belarus continues to actively develop the country's information and communication infrastructure, providing modern telecommunication services for the state, business and citizens.

To date, 170 telecommunication operators have a license in the field of telecommunications.

Beltelecom actively switches subscribers to the IMS platform, providing a wide range of telecommunications services.

The increase in the external Internet access channel, the modernization of data transmission networks and the connection of subscribers using GPON technology continue.

A total of 3,217.2 thousand subscribers have fixed broadband Internet access, and the number of cellular subscribers has reached 11,743 thousand people.

LTE cellular communications cover 99% of the population, and wireless broadband Internet access services cover 89.4% of residents.
