The Ministry of Communications has simplified the use of radio-electronic devices during the preparation and holding of the II European Games of 2019

Under the preparation to the 2nd European Games 2019 and other significant sports competitions, the cultural and entertainment events, as well as to ensure the presence of the official foreign delegations, the demonstration of radio electronic devices at the exhibitions of the Ministry of Communications and Informatization of the Republic of Belarus, there were made changes to the list of radio electronic devices and high-frequency devices that are operated without the appropriate permissions to use the radio frequency spectrum, issued as a result of the assignment of the radio frequencies or radio frequency channels.
The decree of the Ministry of Communications and Informatization was adopted on January 24, 2019 and entered into force on February 16, 2019.

The decree will simplify access to the radio frequency spectrum for civilian radio-electronic devices that will be used during the preparation and holding of the 2nd European Games 2019, as well as improve the image of the Republic of Belarus as a country that uses the radio frequency spectrum without creating unnecessary access barriers to it.
