ICT Ratings

ICT Ratings

The Republic of Belarus is a dynamically developing state in the centre of Europe, where technology is becoming the driver of economic growth and improved quality of life. The importance of technology is enshrined in such key legal acts as:

- National Strategy for Sustainable Development of Belarus until 2040
- Program of Socio-Economic Development of the Republic of Belarus for 2026 – 2030, approved by Decision No. 1 of the Belarusian People's Congress of 19 December 2025
- Decree No. 135 of the President of the Republic of Belarus of 1 April 2025 «On Priority Avenues of Scientific, Scientific-Technical and Innovative Work for 2026 – 2030»
- Decree No. 381 of the President of the Republic of Belarus of 29 November 2023 «On Digital Development»
- Decree No. 136 of 7 April 2022 «On the State Administration Agency in the Sphere of Digital Development and Informatization»
- Concept of Ensuring the Sovereignty in the Sphere of Digital Development until 2030, approved by Resolution No. 1074 of the Council of Ministers of the Republic of Belarus of 31 December 2024
- Government Action Program for 2025 – 2029, approved by Resolution No. 254 of the Council of Ministers of the Republic of Belarus of 8 May 2025
- State Program «Digital Belarus» for 2026 – 2030, approved by Resolution No. 793 of the Council of Ministers of the Republic of Belarus of 30 December 2025, and others

Thanks to the special attention given to the ICT sector, Belarus is actively strengthening its position in the global digital space.

  in the E-Government Development Index

*based on data from relevant international ratings

International ratings play a key role in assessing a country’s technological development on the global stage. They allow comparing a state’s progress in digital transformation with other countries, identifying strengths and weaknesses, and determining directions for further growth.

High positions in such ratings enhance investment attractiveness, contribute to the development of the digital economy, and strengthen the trust of international partners. In addition, ratings serve as a guide for government strategies, helping to adapt global best practices and accelerate the adoption of innovations.

Regular monitoring of the indicators of these ratings makes it possible to adjust digitalization policy in a timely manner, ensuring the country’s sustainable development and competitiveness in the digital era.

Digital Projects’ Showcase

It includes detailed information on the positions of the Republic of Belarus in international ratings in the sphere of digital development with detailed descriptions and interactive charts.

More

For the achievement of high positions in international digitalization ratings in the Republic of Belarus:

- A digital development management system has been created and is functioning, including new approaches to structuring digital development processes in economic sectors and administrative-territorial units of the Republic of Belarus
- State digital projects have been implemented under the State Program «Digital Development of Belarus» for 2021 – 2025, and projects of the State Program «Digital Belarus» for 2026 – 2030 are being implemented
- Competent selection of state IT projects planned for implementation is carried out within the framework of the Council for Projects in the Sphere of Digital Development under the Ministry of Communications and Informatization
- The Republican Fund for Universal Service of Digital Development and Communications is functioning as one of the sources of budget financing for state digital projects
- Scaling of the state digital platform «Smart City (Region)» is underway, aimed at further improving the level of digital development in all regions of the country
