Belarus ranks 22nd in terms of access to ICT among 132 countries of the world

Belarus ranked 22nd in terms of access to ICT among 132 countries of the world according to the Global Innovation Index for 2023.

For reference: access to ICT is a composite index that assigns weight coefficients to 4 indicators (25% each):

Percentage of the population covered by mobile networks (at least 3G, at least LTE/WiMAX);

The number of mobile cellular subscribers per 100 residents;

International Internet bandwidth (bps) per Internet user;

The percentage of households with Internet access.

According to the results of the first quarter of 2024, 99% of the population in Belarus is covered by the LTE (4G) mobile network. The number of mobile connections at the beginning of 2024 was 120.5% of the total population. 89.5% of households in the country have Internet access.
